

Product Data Sheet

RECYCLED HARD WOOD MULCH (RHM)

Recycled Hardwood Mulch is the term used for hardwood timber from demolitions that has been processed to produce a mulch that can be used as a quality landscape material. Two sizes are produced, 50mm mulch (coarse) and 8mm mulch (fine).

1. PRICE ADVANTAGE

ACT Recyclings RHM has a significant price advantage over naturally produced mulches that can save you big dollars.

2. ENVIRONMENTAL BENEFITS

By using recycled products such as RHM you are contributing to a more sustainable construction industry, reducing landfill and preserving our natural resources. In addition to this you are adding credibility to your project and assisting in meeting Green Star ratings.

COMMON APPLICATIONS

RHM is an economical alternative product for any area requiring mulch.
